

Meeting Your Needs in Europe and North America

If you're a US manufacturer or distributor wanting to sell into the European market but need some assistance in determining regulatory requirements, look no further than NSF International and NSF-CMi to support your growing international needs. Likewise, if you're a European company wanting to expand opportunities in the United States or Canada, our two companies can help bridge the gap to regulatory compliance.

What We Offer for Europe

- Expert understanding of the regulatory framework thanks to our pool of industry leaders
- An in-depth knowledge of all food products with particular expertise in dietary supplements and the regulations applicable to them throughout all European Union (EU) member states
- A "one stop shop" service, including all stages of regulatory compliance from generating pack copy to checking artworks and dealing with enforcement challenges
- Translation of regulatory compliance checking within all 27 EU member states

What We Offer for North America

- Product and ingredients certification program, including testing and auditing of your facility in accordance with American National Standard 173.
- Good Manufacturing Practices (GMP) Registration as laid out in Sec 8 NSF/ANSI 173
- Athletic Banned Substances Certification Program, including verification of 144 banned analytes using ISO 17025 accredited methods
- Expertise in the only accredited national standard in dietary supplements and FDA's 21 CFR part 111 at our American state-of-art testing facility

Benefits of Our Service

- Expertise in the field of dietary supplements
- Reliable and efficient service, customized to clients requirements
- Legal compliance to prevent enforcement challenges, re-prints or products being stopped at customs
- Respect from regulatory community
- Assurance

Meeting Your Needs in Europe and North America

Testimonial

Read what one of our satisfied customers thinks of us:

"For the past two years Body Temple, the UK's leading importer and distributor of sports nutrition, has invested considerable time, resources and commitment, ensuring US products comply with the latest EC regulations on labelling and ingredients.

"NSF-CMi and Jamie Weall in particular have been invaluable. The advice, guidance, training and support Body Temple has been given has been second to none, every step of the way. Jamie Weall from NSF-CMi is at the top of his game, and we would not entrust the reputation of our company to anyone else."

Kieron M Stanley, Compliance Manager
Body Temple, UK

About NSF International

NSF International, an independent, not-for-profit organization, helps protect consumers by certifying products and writing standards for food, water, dietary supplements and consumer goods (www.nsf.org). Founded in 1944, NSF is committed to protecting human health and safety worldwide and operates in more than 120 countries. NSF is a World Health Organization Collaborating Centre for Food and Water Safety and Indoor Environment.

NSF's Dietary Supplement Certification Program verifies that what is on the label is in the bottle and that the product does not contain undeclared ingredients or contaminants. NSF's Athletic Banned Substances Certification Program builds on the Dietary Supplement Certification Program by including screening that ensures the product does not contain banned or prohibited substances. MLB, the MLB Player's Association, NFL, the NFL Player's Association, PGA, LPGA and the CCES have all chosen NSF's Certified for Sport™ program to help verify the products their athletes use are safer and free of banned substances. NSF GMP for Sport™ certification verifies that the facility, operations and ingredient sourcing are in compliance with GMP requirements via ongoing audits.

About NSF-CMi

NSF-CMi, part of NSF International's group, is a leading international food safety and assurance company operating throughout the food and nonfood supply chain in EMEA and Asia. NSF-CMi provides consulting, certification and technical services to clients throughout the global food and drink processing industry, advising companies on business strategy, developing and

implementing quality systems, delivering customized training and providing certification to an extensive range of national and international standards.
